

DOUBLE YELLOW

MARKET RESEARCH REPORT

Version 2.0 | Confidential | March 2026

An analysis of the UK parking enforcement landscape — quantifying the financial burden on key professional user groups, the size of the addressable market, and the subscription revenue opportunity at varying levels of market penetration.

SECTION 1	The UK Parking Fines Landscape
SECTION 2	Tradespeople & Tradesmen
SECTION 3	Healthcare Professionals
SECTION 4	Delivery Drivers
SECTION 5	The Double Yellow Opportunity
SECTION 6	Revenue Forecast & Financial Opportunity

SECTION 1

The UK Parking Fines Landscape

Parking enforcement in the UK has reached record levels. The combined volume of council-issued Penalty Charge Notices (PCNs) and privately-issued Parking Charge Notices now constitutes a multi-billion pound annual burden on motorists — one that falls disproportionately on those who park out of professional necessity.

24%

year-on-year rise in private parking tickets

Source: GB News / RAC Drive 2025

London: The Epicentre

London boroughs issued **9,462,185 Penalty Charge Notices** in 2024–25 — a 13.5% increase on the previous year. In April 2025, PCN fine levels were raised for the first time in over a decade.

Source: London Councils Enforcement & Appeals Statistics 2024–25

A System Under Pressure

Private parking companies made over **7.8 million requests to the DVLA** for vehicle keeper records in just the first six months of 2024–25. With fines of up to £100, private operators alone may be generating as much as **£4.8 million in fines every single day**.

Source: DVLA data via Fleet News 2024

Enforcement is no longer reactive. It is systematic — and accelerating. The market is creating its own demand for a counter-system.

SECTION 2

Tradespeople & Tradesmen

Tradespeople — plumbers, electricians, builders, carpenters, plasterers — represent Double Yellow's primary launch target. They park on or near double yellow lines not out of laziness, but out of professional necessity. Their tools are heavy. Their job sites are urban. Their time is money.

£119M

total annual cost to the UK trades sector

Source: Direct Line / VanFleetWorld 2025

£443

average annual cost per tradesperson out-of-pocket

Source: Direct Line Business Insurance 2025

The Depth of the Problem

- 81% of tradespeople struggle to find legal parking at least once a week.
- 75% admit they frequently cannot park close enough to their job site.
- 48% have turned down jobs because they could not park within sight of their vehicle — citing tool theft as a key concern.
- 28% have been clamped or towed while actively on the job.
- Some individual tradespeople spend as much as £6,000 per year on parking fines alone.

Source: Direct Line Business Insurance Research, October 2025

Why Tradespeople Are the Right First Market

The trades community is tight-knit and highly vocal about this problem. Platforms like Checkatrade (650,000+ registered tradespeople), MyBuilder, and Rated People represent ready-made distribution channels. One avoided fine per month more than pays for a Pro subscription.

SECTION 3

Healthcare Professionals

NHS and wider healthcare workers represent one of the most sympathetic segments of the parking crisis. These are people saving lives who return to their car to find a fine — a problem with genuine public outrage and a large, organically connected workforce as the user base.

£70M+

paid by NHS workers in parking fees in 2023/24

25,000+

finest from just 17 trusts (300+ trusts exist in England)

Source: Channel 4 FactCheck 2024

72%

of hospital workers pay to park at their own workplace

Source: GMB Union Survey 2024

Scale of the Problem

- There are over 300 NHS trusts in England. The 25,000 fines captured represent just 17 — the true annual figure runs into hundreds of thousands.
- One cancer coordinator accumulated nearly 200 tickets over a few years, totalling approximately £15,000.
- NHS car park revenue in 2018/19 totalled £271.8 million — £86.2 million from staff alone. Fees have risen significantly since.
- Free NHS staff parking introduced during COVID was subsequently scrapped at most trusts.
- 1.5 million people are employed by the NHS in England — approximately 67% drive to work.

SECTION 4

Delivery Drivers

The UK's last-mile delivery sector is the fastest-growing segment of commercial road use. Couriers make dozens of stops per day in urban areas — parking briefly at each. They represent a high-frequency, high-exposure user group with an acute and daily parking problem.

£4.8M

per day estimated in private parking fines across the UK

Source: inkl / RAC Drive 2025

The Delivery Sector at a Glance

- Evri alone operates a network of 28,000 self-employed couriers. Amazon Flex, DPD, Royal Mail, Yodel, and DHL add hundreds of thousands more.
- A single £160 PCN for a brief illegal stop can wipe out an entire day's earnings for a self-employed courier.
- The 24% annual hike in private parking tickets disproportionately hits the delivery sector.
- Pavement parking bans extending to Scotland (2025) and anticipated in England further limit stopping options.
- Delivery driver communities on Facebook and Reddit are highly active — word spreads fast when something saves them money.

SECTION 5

The Double Yellow Opportunity

When the three primary target segments are considered together, the scale of the problem — and the opportunity — comes into sharp focus.

SEGMENT	TICKETS / YEAR	ANNUAL COST	CORE PAIN POINT
Tradespeople	2.3 million	£119 million	Park out of necessity; fines eat directly into margins
Healthcare Workers	Hundreds of thousands (25k from 17 trusts alone)	£70M+ in fees + fines	Long shifts; hospital parking restrictions
Delivery Drivers	Significant share of 14.4M private tickets	Up to £160 per stop	Multi-stop routes; no safe stopping options

Network Effects & Defensibility

Double Yellow becomes more valuable as user density increases — a flywheel that, once spinning, is extremely difficult to stop. Gamification is designed specifically to drive the engagement needed to reach and maintain critical mass. Once a city has density, the product becomes very difficult to displace. Searching for parking already costs the UK economy an estimated **£23.3 billion per year** in wasted time alone (INRIX). The total addressable market extends well beyond these three segments to all 34 million licensed UK drivers.

The UK issues more than 200,000 parking tickets every single day. Double Yellow is built to change that — and to build a business doing it.

Revenue Forecast & Financial Opportunity

The following projections model subscription revenue from the three core professional segments. These represent a conservative, addressable subset of the total UK market. General consumer users, B2B fleet accounts, and ad revenue from the free tier are not included in these figures — they represent upside only.

Our Core Addressable Market

2,000,000

Tradespeople Total UK construction & skilled trades workforce
Source: ONS / Statista 2024

700,000

Healthcare Workers NHS staff who regularly face street parking risk
Source: NHS Digital 2024 / ONS

300,000

Delivery Drivers Self-employed couriers & gig economy drivers
Source: Institute of Couriers 2024

Total core addressable market: 3,000,000 potential subscribers — before counting the general public, urban commuters, or B2B fleet accounts.

Our Subscription Tiers

TIER	MONTHLY PRICE	ANNUAL PRICE	INCLUDES
Free	£0	£0	Unlimited activations, ad-supported
Basic	£2.99	£35.88	8 activations/month, ad-free
Pro	£5.99	£71.88	20 activations/month, ad-free, priority alerts
Unlimited	£15.99	£191.88	Unlimited activations, ad-free, all features

The blended ARPU used in our projections assumes a realistic subscriber mix of 55% Basic / 35% Pro / 10% Unlimited, producing a blended monthly ARPU of **£5.34/month** (£64.08/year). This is conservative — as the product matures and B2B fleet pricing activates, ARPU will increase.

Revenue Projection — Tradespeople

Total addressable market: **2,000,000**

At just £5.99/month, one avoided fine per month more than covers the Pro subscription — making the conversion argument almost trivially easy to make in this segment.

PENETRAT ION	SUBSCRIBERS	BASIC £2.99/mo	PRO £5.99/mo	BLENDED £5.34/mo
10%	200,000	£7.2M	£14.4M	£12.8M
20%	400,000	£14.4M	£28.8M	£25.6M
30%	600,000	£21.5M	£43.1M	£38.4M
40%	800,000	£28.7M	£57.5M	£51.3M
50%	1,000,000	£35.9M	£71.9M	£64.1M

Revenue Projection — Healthcare Workers

Total addressable market: **700,000**

A large, sympathetic, and organised workforce with immediate daily utility. Union outreach (GMB, UNISON, RCN) and NHS trust intranets provide highly targeted distribution.

PENETRAT ION	SUBSCRIBERS	BASIC £2.99/mo	PRO £5.99/mo	BLENDED £5.34/mo
10%	70,000	£2.5M	£5.0M	£4.5M
20%	140,000	£5.0M	£10.1M	£9.0M
30%	210,000	£7.5M	£15.1M	£13.5M
40%	280,000	£10.0M	£20.1M	£17.9M
50%	350,000	£12.6M	£25.2M	£22.4M

Revenue Projection — Delivery Drivers

Total addressable market: **300,000**

The smallest of the three segments by market size, but the highest frequency users. Multiple activations per day means maximum engagement and maximum ad revenue from the free tier.

PENETRAT ION	SUBSCRIBERS	BASIC £2.99/mo	PRO £5.99/mo	BLENDED £5.34/mo
10%	30,000	£1.1M	£2.2M	£1.9M

20%	60,000	£2.2M	£4.3M	£3.8M
30%	90,000	£3.2M	£6.5M	£5.8M
40%	120,000	£4.3M	£8.6M	£7.7M
50%	150,000	£5.4M	£10.8M	£9.6M

Combined Revenue — All Three Segments

Using the blended ARPU of **£5.34/month** across all paid subscribers:

SEGMENT	TOTAL MARKET	10% PENETRATION Annual Revenue	20% PENETRATION Annual Revenue	30% PENE- TRATION Annual Revenue
Tradespeople	2,000,000	£12.8M	£25.6M	£38.4M
Healthcare Workers	700,000	£4.5M	£9.0M	£13.5M
Delivery Drivers	300,000	£1.9M	£3.8M	£5.8M
TOTAL	3,000,000	£19.2M	£38.4M	£57.7 M

Phased Revenue Roadmap

A realistic three-year trajectory — assuming a London-first launch strategy targeting the trades and delivery communities, followed by geographic expansion:

YEAR	PHASE	TARGET SUBSCRIBERS	ESTIMATED ANNUAL REVENUE	KEY MILESTONES
Year 1	Launch & Seed	5,000–15,000	£320K–£965K	London trades focus; organic growth; AdMob revenue from free tier
Year 2	Scale	50,000–150,000	£3.2M–£9.6M	Major UK cities live; healthcare & delivery outreach; B2B fleet pilot
Year 3	Dominance	300,000+	£19.3M+	10% penetration of core market; B2B fleet revenue activating; international scoping

At 10% penetration of the core professional market alone — before the general public, B2B fleet accounts, or international expansion — Double Yellow generates over £19 million in annual recurring subscription revenue.

Additional Revenue Streams Not Modelled Above

- Ad revenue from the free tier — every free user activation triggers an interstitial ad (Google AdMob already integrated). Even at conservative CPM rates, 100,000 monthly active free

- users generates a meaningful six-figure annual add-on.
- B2B fleet pricing — trade companies with 10+ employees represent a significant SaaS opportunity. A fleet plan at £20–50/month per company across even 1,000 companies = up to £600K/year additional.
- "Buy a Coffee" micro-tipping — the platform takes a cut of every peer-to-peer tip. Low value per transaction, but high volume and zero marginal cost.
- International expansion — the parking enforcement problem exists in every major city globally. The architecture is built to scale geographically from day one.
